PROFESSIONAL SUMMARY

Software Engineer with career aspirations in full-stack web development, a cheerful disposition, and an analytical bent seeks entry-level opportunities in full-stack development.

Projects:

Pacman: Built out a functional pacman game using exclusively raw javascript, HTML and CSS.

JevMedia: Built a full-stack facebook type web-page with password encryption and functional session integration.

SlackOverflow: Built full-stack website using python django. The purpose of the website was to emulate stack overflow for the sake of creating a forum to post, and answer questions.

Professional Experience:

General Assembly, Remote.

As a General Assembly student, I worked towards refining my development skills, learning several frameworks in both Python and JavaScript, while getting the chance to develop multiple projects.

GetSales, Austin, TX

Owner-operated sales fulfillment process provider

Inside Sales Team Lead: Feb 2021-present.

Managing and coaching a sales team to perfect their phone conversations with potential DoorDash drivers, guiding them to complete their first delivery.

- Manage and coach a team of 6-10 sales reps by providing structure and coaching
- Support new team members in improving results by providing structure and coaching
- Promoted from Inside Sales Rep I after 7 months
